About This Content

The Outworld-born Master of Kombat has always been sympathetic to Earthrealm's plight. Thus he has spent his long life training Earthrealm's warriors for Mortal Kombat. Most notably, he trained the Shaolin Monks Kung Lao and Liu Kang. Now he brings his mastery into the arena to prove his dominance against all opponents.

Processor: Intel Core i5-750, 2.67 GHz | AMD Phenom II X4 965, 3.4 GHz

Memory: 3 GB RAM

Graphics: NVIDIA GeForce GTX 460 | AMD Radeon HD 5850

DirectX: Version 11

Network: Broadband Internet connection

Storage: 36 GB available space

English,French,Italian,Polish,Russian,German

This game is amazing. It does the perfect job of capturing the memories from older games like marble blast while also adding new things to keep the level design modern and fresh. The gameplay is addictive and it just feels right. This is a must have for any fans of platformers.. This game is 5 bucks and its still overpriced... It's buggy, and its not very immersable.. It's hard to do anything, has horrible sound and is overall not good... If you want a fighting simulator, youd be best off getting a WMMA game from Greydog Software.. Best game ever! Already my 3rd most played game 10/10 would buy again. Overall a pretty good addition to Choice of Games' lineup. It ends somewhat abruptly but is cheap enough and enjoyable enough for me to forgive this flaw, but that might be because I like the setting.

If you like the sound of being an officer of a vessel in a world that resembles Napoleonic era Earth, then you'll probably like this.. The dark souls of... balls?. I feel like I have played much much more than Steam is showing for me on this one. I love the style art and puzzles in this one. \$10 is a very fair price for what you get, there is plenty of content for me and it is all well polished, and has lots of personality. Very postive review!

Play as one of Amazon's delivery drones, solve puzzles for snarky customers who filled in the "special request" line of their order with confusing demands in hopes Amazon would compensate them if you(the drone) are unable to deliver their junk in 30 minutes or less.

Most of the puzzles are straight forward and intuitive but still unique and rewarding to work out. (no reused puzzles/solutions) The environment and level design are well made and follow the game's atmosphere nicely.

Game can be finished in about an hour at a casual pace, easy to put down and pick back up to if you need a break. Recommended mostly for it's quirky charm rather than deep puzzle solving. I think the only caveat was that the ending seemed fairly abrupt lacking a big finale, I thought I was only moving on to the next area then credits started rolling.

WASD/arrow keys to move, spacebar/enter/Ctrl/Mouse1 to use your magnet for manipulating objects/switches. Easy to play with limited dexterity.

I enjoyed this game a lot

. Good game, but definitely not worth 5 bucks when you look at it today. Consider buying the Popcap Complete Pack instead.. A lot of work went into this game, no doubt. The graphics are nice, if old and overly repetitively tiled. The Professor could have more comments, given the pace at which he insults/encourages us. The physics are a little off, and some of the controls are not intuitive. Over all, this game has been done well in the past, and I'd say that it's currently being done better in Amazing Alex and the Incredible Machine. I will not be giving this title more than the half hour I've spent on it.. Short but very interesting puzzle game.. Don't spend money on this. There is absolutely no reason to spend even one precious second on it. Value your life! Heed my warning! Flee!
